

Critical Making in Education

MANIFESTO

As Critical Makers ...

we provide support, not services.

we ask questions.

we find and create solutions.

we work together.

we learn with and from each other.

we use making to understand.

we strive to be inclusive.

we share.

we seek meaningful use of tech.

we are responsible for our creations.

we create transparency.

we repair, reuse, recycle and repurpose.

The critical making project has received funding from the European Union's Horizon
2020 research and innovation programme under grant agreement No 101006285
